

## SUPERCABLE 78

The special double braid construction with Dyneema<sup>®</sup> cover provides: minimum elongation, high tensile strength, low weight, maximum cable flexibility, easy splicing and excellent durability. This cable is particularly suitable for the production of runners, forestays, removable forestay, backstay, structural strops, bobstay and the standing rigging of small boats. It also finds wide use on life lines, replacing the steel wire ropes.

There is also a Supercable 99 available by order. Supercable 78 and 99 differ in terms of breaking load and lightness. Indeed Supercable 99 guarantees higher performance and lighter weight compared to the ratio between diameter and breaking load.

### SUPERCABLE78

DIAMETER [mm]	BREAKING LOAD [daN]	WEIGHT [g /m]
4	1.444	12,00
5	2.800	19,00
6	4.282	28,00
7	6.200	40,00
8	8.080	45,00
9	9.836	54,00
10	12.446	71,00
11	14.680	83,00
12	15.550	92,00
13	17.300	114,00
14	18.220	140,00
